Library Management System Using HTML and CSS

Aim: To design a Library Management System using HTML and CSS to manage books, issue and return books, calculate fines, and update study materials through an admin dashboard.

HTML Code:

```
<!DOCTYPE html>

<html lang="en">

<head>

<meta charset="UTF-8">

<meta name="viewport" content="width=device-width, initial-scale=1.0">

Result:

The Library Management System user interface was successfully designed using HTML and CSS. It provides forms and tables to help librarians manage books, student book issues, returns, fines, and study materials efficiently.
