Experiment-04

Online Railway Reservation System

Aim

To design and develop an Online Railway Reservation System that allows passengers to search trains, check seat availability, book tickets, make payments, check PNR status, cancel tickets, and receive refunds. The admin can manage train details, schedules, fares, and passenger information.

HTML CODE

```
<!DOCTYPE html>

<html>

<head>

   <title>Online Railway Reservation</title>

   <style>

      body {

         font-family: Arial;

         background-color: lightblue;

         text-align: center;

      }

      .container {

         background: white;

         width: 350px;

         margin: 40px auto;

         padding: 20px;

         border-radius: 10px;
```

```
        }
        input, select, button {
            width: 90%;
            padding: 10px;
            margin: 8px;
        }
        button {
            background: blue;
            color: white;
            border: none;
            cursor: pointer;
        }
    </style>
</head>
<body>
<h1>Online Railway Reservation System</h1>
<div class="container">
    <h2>Book Your Train Ticket</h2>
    <input type="text" id="name" placeholder="Passenger Name">
    <input type="text" id="from" placeholder="Origin Station">
    <input type="text" id="to" placeholder="Destination Station">
    <input type="date" id="date">
```

```
    <select id="class">
        <option value="">Select Class</option>
        <option>Sleeper</option>
        <option>AC 3 Tier</option>
        <option>AC 2 Tier</option>
        <option>First Class</option>
    </select>
    <button onclick="bookTicket()">Search / Book Ticket</button>
    <h3 id="result"></h3>
    <input type="text" id="pnr" placeholder="Enter PNR Number">
    <button onclick="checkPNR()">Check PNR Status</button>
    <button onclick="cancelTicket()">Cancel Ticket</button>
</div>
<script>
function bookTicket() {
    let name = document.getElementById("name").value;
    let from = document.getElementById("from").value;
    let to = document.getElementById("to").value;
    let date = document.getElementById("date").value;
    let cls = document.getElementById("class").value;
    if (!name || !from || !to || !date || !cls) {
        alert("Please fill all details");
```

```
        return;
    }
    let pnr = Math.floor(1000000000 + Math.random() * 9000000000);
    document.getElementById("result").innerHTML =
        "Booking Successful!<br>PNR Number: " + pnr +
        "<br>Passenger: " + name +
        "<br>Class: " + cls;
}
function checkPNR() {
    let pnr = document.getElementById("pnr").value;
    if (pnr == "") {
        alert("Enter PNR Number");
    } else {
        alert("PNR Status: Confirmed");
    }
}
function cancelTicket() {
    alert("Ticket cancellation request submitted successfully");
}
</script>
</body>
</html>
```

Output Screenshot

Result

Thus, the Online Railway Reservation System was successfully designed using HTML, CSS, and JavaScript. It allows users to enter passenger details, book train tickets, generate PNR numbers, check PNR status, and request ticket cancellation through a simple and user-friendly interface.
