EXPERIMENT NO – 02

Online Hotel Room Booking System Using HTML and CSS

Aim: To design an Online Hotel Room Booking System using HTML and CSS that allows users to register, manage profiles, check room availability, book rooms, view booking history, modify or cancel bookings, and enables administrators to manage room prices, availability, bookings, and website information.

HTML CODE:

```
<!DOCTYPE html>
<html>
<head>
  <title>Hotel Room Booking System</title>
  <style>
    body {
      font-family: Arial;
      background: #f2f6fa;
      margin: 0;
    }
    header {
      background: #003366;
      color: white;
      text-align: center;
      padding: 20px;
    }
    nav {
```

```
    background: #005580;
    padding: 15px;
    text-align: center;
}
nav a {
    color: white;
    margin: 10px;
    text-decoration: none;
}
section {
    background: white;
    margin: 20px;
    padding: 20px;
    border-radius: 8px;
}
h2 {
    color: #003366;
}
input, select, textarea {
    display: block;
    width: 95%;
    padding: 10px;
    margin: 10px 0;
```

```
        }
        button {
            background: #005580;
            color: white;
            padding: 10px 18px;
            border: none;
            cursor: pointer;
            margin: 5px;
        }
        footer {
            background: #003366;
            color: white;
            text-align: center;
            padding: 15px;
        }
    </style>
</head>
<body>

<header>
    <h1>Online Hotel Room Booking</h1>
    <p>Book Your Perfect Stay</p>
</header>
```

```
<nav>
    <a href="#register">Register</a>
    <a href="#search">Search Rooms</a>
    <a href="#booking">Book Room</a>
    <a href="#history">Booking History</a>
